cubit storage system

cubit

Cubit is a revolutionary storage system that features 16" x 16" storage modules that can be connected horizontally, stacked vertically, rearranged or connected in a fun whimsical design. Each module is available as open; open with a back, acoustical tackable fronts or sides, whiteboard, veneer, or laminate. Cubit is also available with a door or even a drawer.

Create the storage solution for your space by creating a desk, credenza or even wall mount them for overhead storage. You can create a bookcase, a divider wall or add casters and an upholstered top to create additional seating. Add to them, rearrange them, recreate them, move them around, the options are endless.

All Cubit individual storage modules are predrilled to accept all of the design options. If you decide to add a drawer, door or whiteboard to an open unit, no need to order the whole module, you can just order the component you desire and it is ready to attach.
